### ABSTRACT:

AI

The invention relates to an apparatus having a control circuit, including which  
~~comprises a feedforward filter arrangement (1) and a controller (3). The invention is~~  
~~characterized in that a~~ An adaptation of the parameters ( $P_F$ ) of the feedforward filter arrangement  
(1) and the parameters ( $P_C$ ) of the controller (3) is effected during operation of the apparatus.
